Imagine it. Delivered.

As a global network of professionals working with clients and communities, we develop and implement solutions to the world's most complex transportation challenges.

AECOM connects expertise across services and markets to deliver transformative outcomes. We design, build, finance, operate and maintain projects that unlock opportunities and connect people and economies. At AECOM, our transportation experts are meeting today's demands and laying the foundation for tomorrow's needs.

OpenRail

From Planning through Performance

OpenRail is your complete solution that comprises applications and services for rail and transit infrastructure from design through operations. OpenRail delivers enhanced collaboration and coordination and enables the conceptual and detailed design, construction, operation, and maintenance of rail infrastructure assets, combining digital components, context and workflows, while ensuring compliance with requirements using a systems engineering approach. OpenRail leverages your existing investment in BIM through its connected data environment (CDE). OpenRail manages organizational, project, and asset workflows and promotes adherence to industry standards.

OpenRail enables asset performance modeling by bridging the gap between the CAPEX phase of a project through handover into OPEX, enabling secure access to accurate and trusted asset information.

- **OpenRail ALIM** configuration management capabilities ensure information integrity through closed-loop change management and help enable positive train control (PTC) deployment by providing best practice configuration management capabilities to address the problem of information integrity in a changing environment.
- **OpenRail Asset Reliability** ensures your assets are safe, reliable, and efficient over their operating life and enables you to develop proactive strategies that improve long-term asset reliability and performance.
- **OpenRail Operational Analytics** helps you harness asset and operations-related data for decision support that reduces operational costs, improves safety, performance, and reliability, while optimizing asset performance.

Roundtable on Passenger Rail-Oriented Development

September 11, 2018 | 3:00 p.m.–5:00 p.m.

The Build America Transportation Investment Center (BATIC) Institute: an AASHTO Center for Excellence is hosting a Roundtable on Passenger Rail Oriented Development on September 11, 2018, in conjunction with the Council on Rail Transportation meeting being held in Miami, Florida. This roundtable will provide a forum for state DOTs and other stakeholders to exchange ideas and best practices, and identify common challenges and opportunities in delivering and facilitating development adjacent to transit, commuter, and passenger rail facilities. The roundtable will include participation by representatives of the Build America Bureau, who will be available to discuss federal resources available for advancing such projects.

AGENDA

WELCOME & INTRODUCTIONS (10 minutes)

Anna Bosin, BATIC Institute:
An AASHTO Center for Excellence
Danielle Rinsler, Deputy Director, Office
of Outreach and Project Development,
U.S. DOT Build America Bureau

1 Financing Passenger Rail and Rail Oriented Development

(15 minutes introductory remarks, 15 minutes Q&A)

After touring the new Miami Brightline Passenger Rail Extension in the morning, come hear about the stages of development and the creative financing strategy behind the project!

Introductory Remarks

Rusty Roberts, VP of Corporate
Development, Brightline

2 Amtrak Station Development

(15 minutes introductory remarks, 15 minutes Q&A)

A trip on one of Amtrak's trains involves more than the ride itself; every journey begins and ends at a station. As a result, stations are vital – they profoundly affect the experience our customers have in using our services and they are important economic anchors in the communities we serve. Through strategic partnerships, Amtrak is seeking to execute a number of customer improvements and economic development opportunities at its major stations in New York, Philadelphia, Baltimore, Washington, D.C. and Chicago.

Introductory Remarks

Rina Cutler, Senior Director Major
Stations, Planning & Development, Amtrak

3 TOD Sketch Planning

(15 minutes introductory remarks, 15 minutes Q&A)

The Station Management Toolbox enables Caltrain staff to test the effects of certain key variables (general service levels and fares, station area development, and access facilities and services) on ridership, mode of access/egress, revenue, and equity and environmental factors at both individual stations and system-wide. The presentation will discuss tool development, inputs, outputs, and intended uses, as well as potential limitations.

Introductory Remarks

Kathrin Tellez, Principal, Fehr and Peers,
Transportation Consulting

4 Available Funding and Financing Tools

(10 minutes introductory remarks, 10 minutes Q&A)

Overview of Bureau and DOT products relevant to passenger rail and transit oriented development projects.

Introductory Remarks

Danielle Rinsler, Deputy Director, Office
of Outreach and Project Development,
U.S. DOT Build America Bureau

Roundtable on Freight Rail Investment

September 11, 2018 | 1:00 p.m.–3:00 p.m.

The Build America Transportation Investment Center (BATIC) Institute: an AASHTO Center for Excellence is hosting a Roundtable on Freight Rail Investment on September 11, 2018, in conjunction with the Council on Rail Transportation meeting being held in Miami, Florida. This roundtable will provide a forum for state DOTs and other stakeholders to exchange ideas and best practices, and identify common challenges and opportunities in facilitating freight railroad investment for economic development. The roundtable will include participation by representatives of the Build America Bureau, who will be available to discuss federal resources available for advancing such projects.

AGENDA

WELCOME & INTRODUCTIONS

(10 minutes)

Matt Dietrich, Executive Director,
Ohio Rail Development Commission

Leo Wetula, Project Development
Lead, U.S. DOT Build America Bureau

1 Freight Rail Investment for Economic Development

(15 minutes introductory remarks, 15 minutes Q&A)

There is significant market demand for rail-served sites. What are the key characteristics of a desirable rail-served site? How can public agencies facilitate investment in this area in order to foster economic development?

Introductory Remarks

Larry Kahn, Director of Rail Advisory
Group, Cushman & Wakefield

2 Freight Rail Economic Development Challenges and Opportunities, a State Perspective

(15 minutes introductory remarks, 15 minutes Q&A)

True rail-served sites are a premium. Successful development requires bringing key stakeholders, including the rail provider, to the table to facilitate successful outcomes.

Introductory Remarks

Tonya Crist, Owner and Project
Manager, InSite

3 Tennessee Freight Investment Selection Process

(15 minutes introductory remarks, 15 minutes Q&A)

Tennessee's approach to freight investment is evolving toward a more collaborative approach between the state's Department of Economic Development and Department of Transportation.

Introductory Remarks

Liza Joffrion, Director of the
Multimodal Division, Tennessee DOT

4 Available Funding and Financing Tools

(10 minutes introductory remarks, 10 minutes Q&A)

Overview of Bureau and DOT products relevant to passenger rail and transit-oriented development projects

Introductory Remarks
